Data Link Layer Design & Framing Techniques

Coverage: Node-to-Node Link Services, Character Count, Byte Stuffing (Flag/ESC), Bit Stuffing (HDLC), Physical Coding Violations

Prepared by: Prof. Anju Markose | Assistant Professor, Dept. of Computer Science & Engineering | VJCET

1. Framing Methods

- Byte Stuffing: Uses Flag 0x7E and ESC 0x7D for character transparency.
- Bit Stuffing (HDLC): Inserts a 0 bit after every 5 consecutive 1s.

■ KTU University High-Yield Exam Questions

- Q: Explain the four framing methods in the Data Link Layer. (8 Marks)
