Physical Transmission Media (Guided & Unguided)

Coverage: Guided (Twisted Pair UTP/STP, Coaxial Cable, Fiber Optics MMF/SMF), Unguided Wireless (Radio, Microwaves, Infrared)

Prepared by: Prof. Anju Markose | Assistant Professor, Dept. of Computer Science & Engineering | VJCET

1. Guided Media

- Twisted-Pair (Cat 5e/6 UTP, RJ-45). Coaxial (10Base5/2, BNC). Optical Fiber (Total Internal Reflection, Single-Mode SMF zero modal dispersion).

2. Unguided Wireless Media

- Radio Waves (Omnidirectional, wall penetration), Microwaves (Line-of-sight parabolic dish), Infrared (Short range, contained by walls).

■ KTU University High-Yield Exam Questions

- Q: Compare Single-Mode and Multimode optical fibers and compare guided vs unguided media. (8 Marks)
